- All utility bills included
- Contents insurance is included

Speciality

If you do not meet the requirements for your chosen programme you can choose to study 1 or 2 terms of English language preparation beforehand.

Pre-master's (Engineering)

Additional information

Degree Overview

The MSc Mechanical and Manufacturing Engineering programme will allow you to tailor the course to your own needs. Through this course you will be able to gain knowledge you need for careers in the mechanical and manufacturing engineering fields, as well as critical insight of management issues and extensive knowledge of industrial applications. You will have the opportunity to pursue specialist interests through the project element of the course. Many of the projects undertaken by our students reflect the key research interests of the department, such as manufacturing, bulk materials handling and instrumentation. However, projects are also derived from our links with industry or from students' own interests or experiences.

Study Reasons

- This course is accredited by the Institution of Engineering and Technology as satisfying the further learning requirements for chartered engineer (CEng) registration.
- This course provides a wide variety of opportunities for mechanical and manufacturing engineers in a range of sectors, from the automotive to the process industries.
- We have a team dedicated to enhancing student employment outcomes. This includes an Employer Partnerships Manager, who works with companies to provide placement and employment opportunities.
