Additional information

Degree Overview

Understanding and comprehension of supply chain management and logistics is increasingly important in business and management. This MA course in Logistics and Supply Chain Management explores supply chain networks in global and domestic contexts and prepares you to address issues such as cost reduction and service enhancement. Through this programme you will explore a range of study area that include the functions of procurement, production, distribution and customer service, alongside a diverse range of designs and structures. You'll also have the opportunity to visit industrial locations, attend seminars from industry guest speakers, and collaborate with business partners for a dissertation. In the final stage of this course, you will undertake a two-week consultancy project with selected companies.

Study Reasons

- This degree is one of very few in the UK to be accredited by both the Chartered Institute of Logistics and Transport (CILT) and the Chartered Institute of Procurement and Supply (CIPS).
- The university of Greenwich unique curriculum includes many practical examples of logistics and SCM in action.
- Graduates can pursue careers in service and manufacturing sectors, purchasing, logistics and supply chain management for services and manufacturing in the private, public and voluntary sectors, and consultancy.
