Additional information

Degree Overview

Up on the end of this degree in human nutrition, you'll be able to explain the significance of diet and nutrition-related illnesses to others to improve their wellbeing. You will start your studies with the fundamentals: an introduction to biochemistry, biology and physiology, chemistry for life science, and the basic principles of nutrition. As the course progresses, modules on this programme will then introduce to more specialist and advanced areas, such as clinical, human and public health nutrition. This degree is accredited by the Association for Nutrition, this course leads to careers in healthcare, teaching, academia, research, the food industry, and sport and exercise nutrition.

Study Reasons

- Students studying human nutrition can expect to earn up to £30,000 on graduation (HESA, 2020).
- The teaching staff at the University of Greenwich are highly qualified and research active, they have great links with employers
