Requirements

Entry Requirements

The programme is ideally suited if you are just starting to work in the area of web design, or would like to do so. No prior academic qualification or professional experience in web design is required.

You will require access to a standard laptop or desktop computer and a broadband Internet connection.

There are no additional software products to purchase. This course uses only free-to-download software and a range of free-to-use online services and resources. These include Microsoft Visual Studio Code for building web pages, GitHub for website hosting, Google Fonts for typefaces, and Pexels, UnDraw and Font Awesome for stock photography, illustrations, videos and icons.

Accommodation

Speciality

One evening per week

- Wednesdays

Additional information

Course Overview

This diploma in web designing will take you on a journey from the basics of working with HTML5 and CSS3 files to building a personal portfolio website, gaining a solid, practical foundation in modern web design along the way. Complete beginners can be assured that this online web design course has been designed to get you quickly established with everything it takes to build a responsive, quality website. Those with some experience in web design will be greeted with a deeper understanding of web design and the opportunity to extend their skills and validate their expertise with a professional qualification.

Each week you will be tasked with an exercise that will build you up to a complete, professional-quality portfolio website that demonstrates your growth and achievements as a web designer. You will graduate with the opportunity to showcase your expertise to prospective employers and clients as you navigate your career journey.

On completion of the Diploma in Web Design Course graduates will be able to:

- Understand the basics of HTML, CSS and website hosting.
- Use visual and AI software tools to create web pages quickly and easily.
- Work with images, video, fonts and animations.
- Build six professional-quality websites.
- Track user visits and interactions and comply with privacy laws.
- Design a personal portfolio website and showcase their work on LinkedIn and other platforms.

What is a Professional Diploma?

This hands-on diploma takes you from the basics of HTML5 and CSS3 to creating a professional portfolio website, providing a strong foundation in modern web design. Whether you're a complete beginner or looking to deepen your skills, this course equips you to design responsive, high-quality websites with confidence.
