Additional information

Degree overview:

Our MS in Financial Operations and Technology prepares students for jobs related to the development and marketing of financial products and solutions that have a strong technological component, such as securities trading, portfolio management, banking, payment services, credit services, and insurance. The program is targeted toward students who have an interest in technology and a desire to enter the world of operational finance, as well as students with an undergraduate or graduate background in general business who wish to learn more about technology to bring their business skills to bear on the implementation of IT-based solutions to finance problems.

With a degree in Business and Finance, you'll learn business, economic, and financial theories, and develop commercial awareness of a variety of business functions and environments. Subjects include Business Administration, Business Management, Economics, Finance & Accounting, and Human

Resources Management. A degree in this subject area could lead you to a career in:

- Logistics Manager
- Business Analyst
- Human Resources Manager
- Entrepreneur
- Accountant
- Financial Advisor
- Investment Advisor
- Financial Trader
- Banker
- Project or Product Manager
