

University of Roehampton (London)

Cell Biomedicine

Study details

Course type: Master's degree

Degree: MRes (Hons) Cell Biomedicine

Study mode: Full time

Duration: 12 Month

Cost of study

Cost : 17 000 - 18 000 GBP

Reg. fee : N/A GBP

Scholarship :

Insurance : N/A GBP

Intake/s

Sep

Requirements

Entry requirements

Roehampton English Language Test

- Postgraduate degrees - mapped to IELTS scores

TOEFL IBT

- Postgraduate degrees - 89 overall with a minimum of 17 in listening and writing, 18 in reading and 20 in speaking

IELTS Academic

- Postgraduate degrees – 6.5 overall with a minimum 5.5 in each component

Cambridge Advanced Certificate

- Postgraduate degrees - 176 overall with a minimum 162 in each component (some schools require a minimum of 169 in each)

Cambridge Proficiency Certificate

- Postgraduate degrees - 176 overall with a minimum 162 in each component (some schools require a minimum of 169 in each)

All applicants that require a Tier 4 visa must also meet the minimum English Language requirements before we can issue a Certificate of Acceptance for Study (CAS) that is needed to apply for a Tier 4 visa.

Academic requirements

Along with a complete application, EU and international applicants are required to submit various supporting documents. These include:

- Academic qualifications (certificate and transcript)
- Valid English language qualification
- Personal statement
- Two references

Accommodation

Facilities

- 24-hour computer room. Whitelands is able to boast an on-site 24-hour computer room for all Whitelands students to use.
- Quiet Study Area and Manresa Hall.
- College Kitchen & Student Lockers.
- Sports Field and Grounds.
- Catering On-Site.

Accommodation Fees

- £163.00 to 210.00 pw

There aren't any pathways available

Additional information

Degree Overview

With a focus on research methods, you will take your skills to the next level in producing your own research design, and developing your understanding of ethics in research projects and best practice in handling statistical datasets. The programme includes a variety of subject-specific lectures, seminars, tutorials and practical work that will keep you up-to-date with the current advances in the field. You will learn the theoretical and technological aspects of cellular biomedicine and their practical applications within industry. You will be taught by enthusiastic research-active experts in the field who conduct research in a diverse range of topics that you can choose to study such as cellular

and molecular mechanisms of cancer, microbial resistance to antibiotics, immune mechanisms of disease, stem cell research and molecular modelling in cell biology. You will conduct your research project in our state-of-the-art laboratories equipped with microscopy analysers, autoradiography, flow cytometry, high sensitivity HPLC and LC-MS, and neural stem cell and tissue culture facilities.

Study Reasons

- This postgraduate degree will provide you with advanced research training in medical aspects of cell biology and pathology through the completion of your own lab-based research project.
- This postgraduate programme provides both a solid academic basis and practical hands-on experience in the area of cellular biomedical sciences. It will prepare you for careers in academia, clinical research, the health industry or within government organisations.
