Additional information

Degree overview:

Computer science encompasses the study of computers—hardware, software, computational theory, algorithms, and how humans interact with technology. Above all, it's about solving problems. With a master's degree in computer science, you'll be equipped with sophisticated problem solving skills; and be prepared for a lucrative career in this ever-growing sector.

You'll develop your technical abilities in computing and information technology on a Computing degree. Subjects include Artificial Intelligence, Cyber Security, Data Science and Analytics, Information Systems, and Software Engineering. As a Computing graduate, could go on to become:

- Computer Games Developer

- Software Engineer
- Network Engineer
- IT Security Technician
- IT Consultant
- Robotics Engineer
- Forensic Technician
- Data Scientist
