Speciality

Spotlight Module: "Fundamentals in Sustainability and Responsibility"

This **specialised module** is key to delve into the world of **Sustainability** and **Water management**. It is taught online and you will learn the development of critical thinking skills, enabling students to evaluate and assess policy solutions effectively.

Additional information

Innovative water solutions for a sustainable future

Resource conservation, water supply and use: The importance of water as a free good is growing both in the private and public sectors, as well as between political institutions and nations. This demand leads to an increased need for future-oriented solutions that are scientifically based and in line with the current state of research and innovation.

Our **MBA** with specialised modules in **Sustainable Water Management** aims to attract graduates of economic subjects, particularly business administration and industrial engineering, looking to specialise in the **sustainable water development** sector.

This **MBA degree in Sustainable Water Management** at UE is characterised by seminar-style lectures where content is taught to students through workshops, with practical exercises in groups. This study programme is application-oriented and forward-looking. The core modules of this MBA will

take place on campus while the specialised modules are taught online.

Studying an MBA in Sustainable Water Management in Berlin

Berlin isn't just a hip city with great nightlife; it's also a **global hub for sustainability**. Picture this: over 3,000 companies in Germany are all about renewable energy and environmental tech. That means the job market for sustainability experts is booming right here in Germany. We're talking plenty of jobs and billions in revenue every year from the water industry alone! And, of course, let's not forget about the perks of **living in Berlin** – amazing culture, diverse community, and endless opportunities to grow both personally and professionally.
