Speciality

Spotlight Module "Total Quality Management"

In today's competitive logistics landscape, ensuring quality across every aspect of the supply chain is paramount. Our Specialist Module in Total Quality Management (TQM) equips you with the tools and knowledge to excel in this critical area.

Additional information

International Logistics & Transportation Management, MSc

The Master's degree programme International Logistics and Transportation Management (MSc) is application-oriented and provides students with knowledge in the areas of logistics and transportation in an international context and in-depth knowledge in the areas of Total Quality Management, Green Logistics and Sustainability, Maritime-, Land-, City- and Air-Logistics as well as Project Management and Advanced Research Methodologies.

Graduates will have a broad, detailed and critical understanding of logistics and transport at the current level of their field of study and can apply this independently in professional contexts. They will be able to independently develop new knowledge and scientific questions, to work on them on the basis of the current state of research and to generate innovative solutions.

The programme is aimed at graduates of economics and technical subjects, in particular logistics management, transport, technical business administration and engineering.

Your Future Career Perspectives

Globally, markets are developing at a particularly high rate (emerging markets) and are therefore of great importance for the strategy of national as well as internationally operating logistics service providers. Thanks to the broad range of topics offered in our MSc in International Logistics & Transportation Management, our graduates are well prepared to work in leadership positions in the field of logistics management in a nationally and internationally active company.

Possible career fields are as follows: **Regional Logistics Management, International Logistics Management, Logistics Coordination, Logistics Project Management, Supply Chain Management, Sustainability Management & Green Logistics.**
