Additional information

Our STEM-designated MBA program will equip you with the practical leadership skills and advanced knowledge to thrive in management positions.

Today's service-oriented economy presents managers with a formidable array of new products, developing technologies, and emerging markets. The globalized world fosters more international partnerships and mergers than ever before. We've grown our specializations to meet the changes in how, and where, we do business.

We will help you develop a nuanced understanding of the latest opportunities and challenges in the global business environment.

All specializations begin with core courses that provide a broad view of fundamental business concepts. Students then take advanced courses in their chosen specialization, and finish off with a capstone course.

The United States Department of Labor has found that in addition to formal training, employers look for additional "soft skills" to contribute to a company's competitive edge. All students have the opportunity to complete digital badges in Critical Thinking, Ethical Reasoning, Intercultural Knowledge, Lifelong Learning, Oral Presentation, Problem Solving, Quantitative Literacy, Teamwork, and Writing.
