

Arizona State University (Tempe campus)

Psychology (Psychological Science), BS

Study details

Course type: Bachelor's degree

Degree: Psychology (Psychological Science), BS LAPGSPSBS

Study mode: Full time

Duration: 48 Month

Cost of study

Cost : 35 430 USD

Reg. fee : 85 USD

Scholarship :

Insurance : 2 765 USD

Intake/s

Jan/May/Aug

Requirements

Academic requirements

First-year students must:

- Have a 3.00 grade point average (GPA) (a "B" or better where "A"=4.00) from a secondary school. Some ASU programs may have higher admission or English proficiency requirements and may consider a minimum ACT or SAT score.
- Must have three years of high school coursework. (If you are currently in high school, ASU needs to see 9–11 grade coursework. If you have completed high school, ASU needs to see 10–12 grade coursework.)
- Must have and present a completed high school diploma or certificate.

Conditional admission

ASU may offer conditional undergraduate admission to international applicants to an on-campus program who meet the academic (aptitude) requirements but who are not proficient in English. This offer of conditional admission will give you time to improve your English proficiency before you start classes at ASU. Your conditional admission offer is good for up to three semesters, during which time you must meet one of these requirements to begin your ASU experience.

Competency requirements

International students who completed high school outside the U.S. are required to meet the following competency requirements:

- Math: four years (algebra I, geometry, algebra II and one course requiring algebra II as a prerequisite).

- Laboratory science: three years total (one year each from any of the following areas are accepted: biology, chemistry, earth science, integrated sciences and physics).

Provide evidence of English language proficiency (TOEFL 61)

Additional requirements:

The BS in psychology with a concentration in psychological science is open to students who have:

- completed the critical courses for a BS in psychology (ENG 101, ENG 102, MAT 119 or MAT 170, PSY 101, PSY 230, PSY 290) with a "C" or better
- earned at least 45 credit hours
- earned at least an ASU cumulative GPA of 3.00

Students must maintain a minimum cumulative GPA of 3.00 from admittance through graduation.

Additional information

Program description

A BS in psychology that specializes in psychological science immerses students in research-focused learning. They collaborate with renowned faculty at the forefront of innovation and discovery, and explore human and animal behavior, stress, emotions and more from the perspective of a research scientist.

Tailored for those aspiring to pursue a PhD or related scientific graduate studies, this program blends intensive coursework with hands-on learning. The program provides practical experience through internships and connects current students to a robust mentorship network, where alumni guide current scholars throughout their academic journey. Graduates emerge collaborative and are prepared for impactful careers doing research that makes a difference in people's lives.

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Global opportunities

Global experience

When studying abroad, students are able to enhance their understanding of human interaction, culture and behavior through the unique cultural experiences afforded by the opportunities inherent in their program.

Global Education programs expose students to unique differences in the human condition elsewhere in the world and expand their knowledge. Students gain heightened cultural competency, and

communication and critical thinking skills while exploring a new and exciting part of the world. This valuable skill set can set them apart from other applicants when they apply for graduate school or pursue a job after graduation.

Career opportunities

Earning a degree in psychology with a concentration in psychological science opens doors to versatile career paths. Graduates are well-prepared for diverse roles in health and research teaching.

The program's strong foundation also readies students for competitive graduate-level programs in all areas of psychology, law and medicine.
