Additional information

Degree Overview

This degree combines specialised industry-focused engineering with fundamental business skills.

You'll study advanced robotics, looking at multi-modal sensor integration and human-robot interactions, and advanced manufacturing, investigating modern and smart manufacturing technologies.

You'll combine these studies with corporate finance, global risk analysis, and forecasting. You'll be able to implement adopt successful economic strategies, to analyse asset pricing and capital budgeting, interact with global markets and make informed business decisions.

You'll undertake an industrial-related project for at least 12 weeks. This offers exposure to industry, building up your practical experience and network within the UK and internationally.
