Jan/Sep

Requirements

Entry requirements

The entry requirement for a postgraduate taught course is typically equivalent to a UK Second Class Honours Second Division (2:2).

The table below shows how the University equates qualifications from your country to UK degree classifications

Qualification	UK 1st Class	UK 2:1	UK 2:2
Bachelor degree	4.5/5.0 or 81%	4.0/5.0 or 71%	3.5/5.0 or 66%
Specialist Diploma	4.5/5.0 or 81%	4.0/5.0 or 71%	3.5/5.0 or 66%

Accommodation

Key Features & Amenities

- Sports facilities
- Hall Wardens & Security - 24 hour assistance
- Social Spaces
- Well-known food chains
- Accessible launderette
- Focus on sustainability

students may choose to explore private accommodation in Bradford. Average prices are expected to be between £50-£130 per week excluding bills.

Accommodation Costs:

- The Green Village: £85 per week
- Townhouse: £75 per week

Speciality

Sandwich course fees - charged during the placement year away from the University of Bradford for students on thick sandwich courses, or during the year in which the second placement falls for students on thin sandwich courses. Students charged at 10% of the equivalent full-time fee.

If a placement year is to be undertaken abroad and supported by University funding through the University's exchange programmes, fees will increase to 15% of standard fees to cover additional support, advice and administration costs.

Additional information

Degree Overview

It gives you the practical, analytical and interpretative skills you need to apply a wide range of specialist approaches, preparing you not only for research in archaeological science but also to pursue career opportunities in all areas of mainstream archaeology.

You will join a group of postgraduate students from across the world and have the opportunity to use a wide range of specialist facilities and collections, whilst being taught by internationally recognised, research-active academic staff.

You can use the course to obtain broad expertise in the field, or to specialise in areas such as:

Environmental Archaeology, covering environmental change, subsistence and health through studies of animal bones, plant remains and biomarkers in human and non-human hard tissue.

Landscape Archaeology, focusing on understanding and interpreting landscapes in the past using prospection methods, visualisation and GIS.

Chronology and Biomolecules, specialising in the use of physical, chemical and biomolecular methods to study and date both human remains and artefacts.
