- Focus on sustainability

students may choose to explore private accommodation in Bradford. Average prices are expected to be between £50-£130 per week excluding bills.

## Accommodation Costs:

- The Green Village: £85 per week
- Townhouse: £75 per week

## Speciality

**Sandwich course fees** - charged during the placement year away from the University of Bradford for students on thick sandwich courses, or during the year in which the second placement falls for students on thin sandwich courses. Students charged at 10% of the equivalent full-time fee.

If a placement year is to be undertaken abroad and supported by University funding through the University's exchange programmes, fees will increase to 15% of standard fees to cover additional support, advice and administration costs.

## Additional information

# Degree Overview

The focus within this programme on the principles, technologies and practices of cyber security helps you to gain the appropriate skills for future PhD studies and research careers as well as to become competent practitioners. The programme comprises particular developments in security with a firm base in academic research and also offers the opportunity for you to study selected topics in advanced computer science.

Included in the programme is the opportunity to enhance industry relevant skills with study in ISO27001 Lead Implementer and Ethical Hacking. These skill areas were highlighted by past alumni and industry practitioners for inclusion in the programme. Therefore, you have the opportunity to gain additional qualifications in: Certified ISO/IEC 27001 Lead Implementer; and CEH v10 Ethical Hacking.

This programme meets a continued growing demand for specialists in this area by offering a way for individuals in current employment with relevant industry experience as well as recent graduates to study and enhance and develop their skills. The MSc Cyber Security programme will therefore draw graduates wishing to enhance their undergraduate studies in computing with advanced study of security to equip them for senior positions with responsibility for the IT technical and management based security of an organisation. In addition, the programme encourages those with relevant industry skills to specialise in cyber security or refine and develop their existing expertise.
