Additional information

Business Intelligence and Analytics Program and Degree Overview

The Bachelor of Science in Business Intelligence and Analytics is designed to prepare business students for the workforce in the growing field of business intelligence and analytics. Students will learn how to collect, organize, analyze, and interpret data (Big Data).

Graduates will be prepared to demonstrate an understanding of the applications of business analytics in the global, real world of business to help their organization or team identify important business trends and make intelligent decisions.

Business students will learn to use analytics software for business intelligence purposes, including how to use the tools, while developing the critical thinking skills required to gain insights from a range of data sources, i.e., Internet and social media data.

This major also prepares students to provide their organizations with ideas for smarter strategic management, better financial performance, and improved operational efficiencies. Business communication skills feature prominently in this program, as they are a sought after leadership skill.

Faculty and staff are dedicated to providing students with a well-rounded learning experience by using the latest technology and engaging them with real-world business scenarios and hands-on learning exercises.

Business Intelligence and Analytics Major Opportunities

Concordia-Chicago's internship program offers opportunities for students to receive academic credit while gaining practical work experience in business intelligence and analytics.

The campus's proximity to Chicago and public transportation provides easy access to exciting internship and networking opportunities. Everything from large corporations to small start-up firms, nonprofit organizations to advertising agencies build their businesses in Chicago and the nearby suburbs.
