- Free Wi-Fi
- Communal kitchen
- BBQ facilities
- Pool tables
- Basketball court
- Television room
- Laundry
- Off-street parking.

## Speciality

**There aren't any pathways available**

## Additional information

## Degree Overview

The Bachelor of Behavioural Science is a unique program that combines elements of psychology, political science, cultural studies and sociology. Integrating specialised knowledge developed in these social science disciplines and with a strong focus on critical psychology, the program forges a connection between traditional psychology and social work.

During this program, you will understand your place and role in society and respect social and cultural diversity. Embedded within the degree is a specific emphasis on the assumptions and practices that promote substantive reconciliation with Aboriginal and Torres Strait Islander Peoples.

As a graduate, you will be equipped with the skills and knowledge to work with those who may be experiencing marginalisation or disadvantage. Depending on your particular specialisations and choice of subjects, employment opportunities will be available in various industries and fields, including advertising, community development, social impact assessment and more.

**Work Integrated Learning:** The Behavioural Science Internship forms a vital part of this degree and offers you the chance to apply the theoretical knowledge of your degree in a professional environment.

The Internship requires that you complete a minimum of 90 hours within an organisation in conjunction with regular class contact. You may undertake specific projects or tasks, engage in directed research, facilitate groups, write reports and develop projects or program initiatives as part of your internship.

## Study Reasons

- Graduate job-ready with industry-specific skills and knowledge
- Benefit from a unique, personalised approach to education and pastoral care
- Lecturers are industry professionals and leaders in their field
