Additional information

Programme description

The specialisation is designed to provide a view of the air transport system as a certain whole: airlines, airports, air traffic services, aviation authorities and international organizations. The specialisation program emphasizes an understanding of the interrelationships between different aspects of aviation activities. Not just regulatory or institutional considerations. Also on the practical aspects of the functioning of the aviation industry, especially airports.

Development of the specialisation program will take place within the framework of the project "FUTURE airspace administration - education through simulation and practice for the economy of the future" implemented under the European Funds for Social Development 2021-2027 program co-financed by the European Social Fund Plus.

Subjects implemented within the specialisation:

- Structure and organization of civil aviation in Poland
- Aircraft insurance
- Finance of civil aviation in the European Union
- Public support in civil aviation
- Legal aspects of air navigation
- Civil aviation administration in selected countries of the in the world
- Principles of conducting aviation business in Poland
- Efficiency of operation and sustainability of the European aviation system
- Civil aviation safety regulations
- Effectiveness and efficiency of air traffic management networks

Applied tools and certificates

Students have the opportunity to obtain the IATA "Overview of the Air Transportation System" certificate. The International Air Transport Association (IATA) training certificate opens up new career opportunities. IATA certificates are globally recognized. The "Overview of the Air Transportation System" course provides an introduction to the air transportation system and points out the interdependence of its elements and the need for cooperation between : airlines, airports, civil aviation authorities and air navigation services.
