Speciality

The core modules of our MBA study programme are taught in a seminar-style on campus in Hamburg, while the two specialised modules will be held online.

Spotlight Module "Operations and Procedures in Shipping and Logistics"

The **MBA with a specialization in "Shipping and Logistics"** provides students with an optimal transfer of knowledge - the associated special module is always offered parallel to each basic business module so that you can apply your theoretical knowledge around the maritime procedures straight away to hands-on projects.

Additional information

Shape the Future of Global Trade

Logistics, especially the movement of goods by sea, links both business and industry which is becoming increasingly complex. In order to cope with the high demand and to serve constantly growing supply chain networks, innovative and future-oriented management concepts are required, as well as specialists and managers who have the ability to recognise and implement them.

This future-oriented **MBA programme with a specialization in shipping and logistics** is located in Hamburg. The City with the gateway to the world and the third-largest port in Europe and thus one of the most important transshipment ports for global trade via sea route. During your studies, you will be

prepared for becoming an international expert for **supply chain management, logistics and global trades**.

Your Future Career Perspectives

- **Career Opportunities:** Access management positions in sector-specific companies or explore self-employment opportunities with our specialized shipping and logistics MBA.
- **Skills you will learn:** Develop essential skills in leadership, supply chain innovation, and logistics planning to excel in the shipping and logistics industry.
