Placement fee: £1,850

Pathways Available

International Foundation Certificate | International Year Zero

Additional information

Degree Overview

This degree course will you to take your imaginative ideas and make them real. To do that you need both the creativity and the technical skills to bring your ideas to life.

On this programme you'll study the fundamentals of maths and science, electrical, electronic and mechanical principles, and simulation and fluid dynamics, as well as the functional and market-led requirements of product design.

You'll have the opportunity to explore and master specific areas including technology integration, computer-aided design (CAD) and 3D design, sustainability and design for manufacture, and be taught by academics with current industry connections.

Study Reasons

Our graduates are employed across the world and include senior designers and specialists in a variety of areas including consumer product design, industrial design consultancy, project planning, furniture design, manufacturing design, design management, user experience design, interaction design and in research. They are working for global companies including Cambridge Consultants, BMW, JCB, Aston Martin, Triumph, Dyson, Marshalls and Magmatic. Graduates have also gone on to set up their own successful businesses.

Graduates of this course have won awards from D&AD, James Dyson and New Designers.

This course has a 100% employment rate
