Also available are laundry facilities, bike storage, a shared kitchen and weekend parking.

Halls are 10-minutes away from big supermarkets and the train station. Even less is the walk to get to the city centre, full of restaurants, cafes and bars.

Speciality

International College Dundee

If you do not meet our academic grade requirements for your chosen course, we can offer you an alternative route to begin your studies. Our international incorporated degrees will develop your subject knowledge, academic English and university level study skills.

Pathways Available - International Stage One

Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

Degree Overview

Despite its origins in historical tradition, the world of studio jewellery encourages its practitioners to be innovators and pioneers.

Using novel materials and digital technologies, you will work to develop your own voice in an increasingly diverse conversation. Our strong studio culture means that you will be able to share ideas in a supportive environment.

You will develop pieces of jewellery and wearable objects by gaining a deep understanding of the design process, from visual research to concept development to finished outcome. Technical skills form the basis of the course, but you will also learn to consider the historical, social, and aesthetic context of your creations through written assignments.

We teach traditional jewellery making techniques as well as technologies such as CAD/CAM, microelectronics for wearables, novel materials and 3D printing.

Duncan of Jordanstone College of Art & Design's facilities include a specialist metal and mixed materials workshop, in-house casting facilities, studio spaces, digital resources in a well-equipped Make Space, a wood workshop for both 2D and 3D making, and a foundry – one of only a handful in UK universities.

Throughout the course you will have the opportunity to exhibit your work, as well as participate in special projects as they arise within the exciting research environment of DJCAD. Your final year will culminate in an exhibition of your final outcomes as part of the annual Degree Show.

Study Reasons

Recent graduates have been employed in a wide variety of fields of work and postgraduate activity including: self-employed artist or designer
