Overview

ABOUT THE FOUNDATION YEAR

Foundation Year is a two-semester introductory course to first-degree studies. It is a form of entering the studies which later on makes learning process easier and helps in acclimatizing in Poland.

The program is addressed to foreign candidates who apply for bachelor's or master's studies in English at UTA, but due to their insufficient level of knowledge of English language, they cannot attend the first year of degree program. Such candidates must first apply to study and complete the Foundation Year, and then pursue the major program.

After successfully completing the Foundation Year course, participants pursue their chosen field of study. Application documents are assessed once during admission to Foundation Year. The Foundation Year course provides a curriculum aimed at achieving the level of English language knowledge necessary to complete studies conducted in English at the University of Technology and Arts in Warsaw.
