You should be aware that meeting the grade requirements specified does not necessarily guarantee admission as there may be additional requirements you need to satisfy.

Secondary School Leaving Certificate

136+ UCAS tariff points 120 - 135 UCAS tariff points 96 - 119 UCAS tariff points

Foundation Programme required

English language

The standard University requirement is 6.0* with no sub-test less than 5.5 (or equivalent) on IELTS, or on the university's own entry test BASALT. Conditional offers to international students will be made on this basis.

IELTS - at least 6.0*, with at least 5.5 in each of the four sub-tests (speaking, listening, reading, writing).

TOEFL - at least 80*, and sub-tests not less than 18 in Reading, 17 in Writing, 17 in Listening and 20 in Speaking if you require a Student Visa.

Other qualifications which may be accepted:

There are other English language qualifications which may be accepted. For example, the University of Bradford also recognises:

- Cambridge Advanced Certificate - grade C or above
- Cambridge Proficiency Certificate - grade C or above

Please note that we **DO NOT** accept the **TOEIC** test.

Speciality

Pathways Available: International Foundation Year | International Year Zero

Sandwich course fees - charged during the placement year away from the University of Bradford for students on thick sandwich courses, or during the year in which the second placement falls for students on thin sandwich courses. Students charged at 10% of the equivalent full-time fee.

If a placement year is to be undertaken abroad and supported by University funding through the University's exchange programmes, fees will increase to 15% of standard fees to cover additional support, advice and administration costs.

Additional information

Degree Overview

This accredited degree will place you at the heart of modern industry, providing career opportunities in sectors such as: Aerospace, automotive and rail, Energy and power generation, Manufacturing engineering; product design, materials, production and processing.

Through this programme you will combine mechanics, materials science, thermofluids and computational methods to design, analyse and implement complex systems which are economic, reliable, efficient and sustainable.

Modules in this degree will put theory into practice through a range of individual and group projects. For instance, year 1 will see you take part in three projects using your skills to design, build and test real mechanical devices.

You will have the opportunity to participate in the Formula Student competition, working with other students to design and build a single-seater racing car.
