Degree Overview

STEM-classified degree: graduates are eligible for 3 years of Optional Practical Training (OPT) in the USA. The program offered by UConn's College of Engineering is renowned for its excellence in research and engineering education, both locally in Connecticut and on a broader scale. Robotics develops machines that replicate human actions. Robots can be designed to take actions such as lifting or walking, as well as other intelligent tasks such as speech recognition. These machines can assist humans, for example in performing actions dangerous to humans, or in environments dangerous to humans.
