Speciality

Pathway international year zero is available

Additional information

Degree Overview

This extended computing degree begins with a foundation year to prepare you for degree-level learning. Then you will study the syllabus of the three-year course, which covers the theory, technology, practice and application of computing. Through this course you will also have the option to specialise in information systems or network systems if it suits your career plans. Graduates of this course have gone to work in roles that include software development, IT support and consultancy.

Study Reasons

- This course explores the theory, technology, practice, and application of computing and the development of information systems.
- Upon graduation you will be in an excellent position to specialise in Information Systems or Networking, or build a broad range of skills with a general Computing degree?.
