#### Additional information

A contemporary artistic education as a composer and musician combined with sound engineering and organisational know-how form the core of the study programme of the BA Music Production. From the first semester onwards you will have access to our DAWs and studios. Here you will go through all relevant functions and roles within the music production process.

Weekly workshops on colourful topics of music practice such as songwriting and sound engineering, live panels with experts from the music industry, as well as diverse practical projects in each semester offer plenty of opportunities to try out your skills in front of an audience and expand your network. Teachers from all areas of the live and recording industry will support you on your career path.

After graduating with a B.A. in Music Production, you have the experience and versatility to stand your ground in the fast-moving music market. As a composer, you will write music for events and publications. As a performing musician, you will not only make music but also take on the management of concerts and sessions. As a sound engineer, you will record and mix productions under your own direction. As a producer, you will be familiar with all the necessary management tasks.

**The B.A. Music Production programme offers excellent career opportunities such as employment in:**

- Production companies, ensembles, concert organisers, training companies
- Phono industry, labels, publishers, distributors, TV and radio stations, PR and marketing companies

**Collaboration with:**

- Songwriters/composers, lyricists, speakers, bands/music groups, orchestras
- Producers, recording studios, clients from the industry and private sector

Freelance activities as:

- Author/composer, editor/arranger/orchestrator, performer/musician
- Sound engineer/recording engineer for concerts, events, theatre, radio, television, recordings

In the Bachelor's programme in Music Production at SRH University, you will learn everything you need for professional music production. You will develop comprehensive production skills from the basics of recording technology, acoustics and music theory to digital audio technology. You will work with DAWs and sequencers and supplement your knowledge with artistic subjects such as piano and choir. Practical projects, such as the first-semester concert, offer direct insights into the music industry.

You will write and produce your songs in the third semester, from composition to the final mix. You will learn how to realise projects from the music industry and deepen your expertise in sound design, songwriting and music production for media. You will also train your organisational and legal skills to be successful as an author in the music business.

After your practical semester, you will develop your final concert in the sixth semester and complete your studies with a B.A. thesis, which can also include artistic elements.

Start your creative future in the music business and request your information material now to find out more about the Bachelor's programme in Music Production and its curriculum!
