

Arizona State University (Polytechnic Campus)

Applied Science (Applied Leadership), BAS

Study details

Course type: Bachelor's degree(Transfer)

Degree: Applied Science (Applied Leadership), BAS LSALSBAS

Study mode: Full time

Duration: 24 Month

Cost of study

Cost : 35 430 USD

Reg. fee : 85 USD

Scholarship :

Insurance : 2 765 USD

Intake/s

Jan/May/Aug

Requirements

Academic requirements

First-year students must:

- Have a 2.5 grade point average (GPA) (a "B" or better where "A"=4.00) from a secondary school. Some ASU programs may have higher admission or English proficiency requirements and may consider a minimum ACT or SAT score.
- Must have three years of high school coursework. (If you are currently in high school, ASU needs to see 9–11 grade coursework. If you have completed high school, ASU needs to see 10–12 grade coursework.)
- Must have and present a completed high school diploma or certificate.

Conditional admission

ASU may offer conditional undergraduate admission to international applicants to an on-campus program who meet the academic (aptitude) requirements but who are not proficient in English. This offer of conditional admission will give you time to improve your English proficiency before you start classes at ASU. Your conditional admission offer is good for up to three semesters, during which time you must meet one of these requirements to begin your ASU experience.

Competency requirements

International students who completed high school outside the U.S. are required to meet the following competency requirements:

- Math: four years (algebra I, geometry, algebra II and one course requiring algebra II as a prerequisite).

- Laboratory science: three years total (one year each from any of the following areas are accepted: biology, chemistry, earth science, integrated sciences and physics).

Provide evidence of English language proficiency (TOEFL 61)

Additional requirements:

Students applying to this program must have completed an AAS degree from a regionally accredited institution. For students with an Associate of Applied Science from an Arizona community college, the AGECEC is recommended but not required. This program is not available to first-year students.

Accommodation

Speciality

STEM-OPT for international students on F-1 visas

This program may be eligible for an Optional Practical Training extension for up to 24 months. This OPT work authorization period may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing a degree through ASU Online.

Available online

Transfer only degree

Additional information

Program description

The BAS program with a concentration in applied leadership focuses on the practice of innovative and effective management. Students develop the skills and knowledge leaders need to solve problems, communicate effectively, resolve conflicts, assess program effectiveness and manage resources. It provides a valuable pathway for students with AAS degrees in fields such as environmental technology and machine shop technology.

Concurrent program options

Students pursuing concurrent degrees (also known as a “double major”) earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Global opportunities

Global experience

Students studying applied leadership can become influential and innovative leaders in the world. Through unique study abroad experiences across the globe, students gain valuable leadership and communication skills. Whether in a foreign country, in the U.S. or online, by participating in one of the more than 300 available Global Education programs, students expand their scope of learning beyond the classroom and gain hands-on experience in different and exciting cultures. Many of the School of Applied Professional Studies programs allow students to earn credit toward their major for their experiences studying abroad.

Career opportunities

Graduates possess the skills and knowledge needed for leadership positions in a wide range of organizations, including business, government, nonprofit agencies and the service industry. They are prepared become effective leaders in diverse positions, including team leaders, floor managers and shift captains.
