Program description

Degree awarded: MGM Global Management (Global Health Care Innovation)

The MGM program with a concentration in global health care innovation prepares students to assume leadership and managerial responsibilities in global health care organizations.

Students design, apply knowledge to, implement and create innovative solutions that can transform health care ecosystems. They learn how to create and sustain cultures of innovation in health care from multiple perspectives. These perspectives may include personal competence for innovation, use of evidence in decision-making, reframing system infrastructures, financing, cross-cultural communication, entrepreneurship, technology and policymaking. Students develop competence in the design, application and testing of innovative processes and products.

A primary focus of this concentration is to prepare students to lead processes of innovation and transformation globally.

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to build sustainable and trusting relationships with others from diverse parts of the world.
- Develop the ability to inspire others in a global world.
- Demonstrate the ability to lead the transformation of traditional organizational cultures into a culture of innovation by applying theories and techniques of leadership, innovation and implementation science in the global health care industry.

Global opportunities

Global experience

Students in Thunderbird's Master of Global Management program have unique opportunities to apply and hone their learning in international settings. Experiential learning exposes Thunderbird students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level. Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, enabling students to solve

practical challenges by collaborating with the school's corporate partners around the world. Some options include the following:

Global Field Seminars

This two- or three-week seminar exposes students to the dynamics and nuances of doing business in a focused region of the world. Teams of students go on company site visits and attend high-level meetings and presentations with business, government and cultural leaders, as well as with Thunderbird alumni. Students gain invaluable hands-on experience while expanding their global business skills, enabling them to become major assets to any organization they join after graduating.

Global Challenge Labs

This is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the business needs of the client and challenge students to provide sophisticated data and market analysis, strategy recommendations and plans for sustained growth that are both practical and effective.

Career opportunities

Examples of career opportunities include professional titles such as:

- compliance manager
- health administrator
- health care consultant
- medical and health services manager
- operations manager
- patient service manager
- regulatory affairs manager
- social and community service manager
