- Performances and productions
- Special occasions and celebrations

## Speciality

Placement fee: £1,850

## Pathways Available

International Foundation Certificate | International Year Zero

## Additional information

# Degree Overview

The world of technology is becoming ever more integrated with our daily lives, meaning the protection of all the data and information they contain is paramount.

A large number of organisations and businesses are now considering the protection of online information a critical business issue, there's an increased focus and demand on the role of cyber security.

The specialist techniques taught as part of this course will help prepare you for a career in a rapidly growing industry that is currently faced with a shortage of skills.

Graduates of this course have progressed into careers in industry, government and law enforcement, as security analysts, penetration testers, forensic investigators and cyber security engineers, at organisations such as Deloitte, Government Communications Headquarters (GCHQ), Airbus, and Rolls-Royce.

## Study Reasons

DMU has been recognised for conducting world-leading cyber security research, having been named the East Midlands' first 'Academic Centre of Excellence in Cyber Security Research'.

This programme has been developed to help give students the skills needed for careers in the cyber security industry.

Graduates have excellent opportunities to pursue careers in industry, government, or law enforcement in roles such as a security analyst, penetration tester, forensic investigator, or cyber security engineer. Previous graduates from our cyber security programmes have gone on to work for organisations such as Deloitte, GCHQ, Airbus, and Rolls-Royce.
