Speciality

International College Dundee

If you do not meet our academic grade requirements for your chosen course, we can offer you an alternative route to begin your studies. Our international incorporated degrees will develop your subject knowledge, academic English and university level study skills.

Pathways Available - International Stage One

Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

Degree Overview

In Geography you study both social and physical sciences to analyse and understand major challenges facing the world. You will develop creative skills in problem solving, presentation, and communication.

You can specialise in human geography or physical geography, or to combine elements of both. In addition you can study other social science or humanities subjects.

You will also have the opportunity to go on field trips, and to work with partner organisations to help them solve problems that they are currently facing.

Our teaching is based on the research carried out in the department and is focused on three broad themes: creating just communities and places, shaping environmental futures, and geospatial and digital methods.

You will cover specialisms within these themes including:

- health and well being
- city futures
- geopolitics and power
- tourism and globalisation
- policing and security
- hazards and risk

The student-led Geography and Environmental Society also has a programme of activities to help you become part of our community.

Economists examine how societies attempt to make the best use of their scarce resources, so that they can advise governments, individuals, and companies on how to improve decisions and

outcomes.

Traditionally economists advise on investment, inflation, interest rates, and production. Increasingly however, economics takes a wider focus with many economists examining climate change, inequality, and improving healthcare.
