Placement fee: £1,850

## Pathways Available

International Foundation Certificate | International Year One | International Year Zero

## Additional information

## Degree Overview

Economics is one of the key factors to understanding some of the critical questions facing our world. This course will explore these questions while also examining some of the principles and theories that can help us to answer them.

Your studies of this economics degree will also be supported by modules that provide students with an understanding of how to deal with and organise data in a comprehensive way, including modules in Financial Decision Making, New Directions in Economics, Econometrics, Financial Markets and Institutions and Behavioural Economics.

Through this course you'll develop transferable skills that are valued by professionals and industry experts, including well-evidenced empirical analysis and the ability to communicate economic ideas in reports and public audits.

The DMU Trading Room will give you a simulated experience on the same information platform used by leading decision-makers in finance, business and government.

## Study Reasons

Economics has been at the centre stage of policy analysis in the aftermath of the financial crisis and the coronavirus pandemic, with sound economic and data analysis skills and competencies being sought-after in many areas.

This course has a high employability demand according to

Our Economics degree helps to open up a wide range of career opportunities for graduates in areas such business, finance and the civil service.
