Requirements

Entry requirements

The entry requirement for a postgraduate taught course is typically equivalent to a UK Second Class Honours Second Division (2:2).

The table below shows how the University equates qualifications from your country to UK degree classifications

Qualification	UK 1st Class	UK 2:1	UK 2:2
Bachelor degree	4.5/5.0 or 81%	4.0/5.0 or 71%	3.5/5.0 or 66%
Specialist Diploma	4.5/5.0 or 81%	4.0/5.0 or 71%	3.5/5.0 or 66%

Accommodation Costs:

- The Green Village: £85 per week
- Townhouse: £75 per week

Speciality

Pathways Available: Pre-Master's

Sandwich course fees - charged during the placement year away from the University of Bradford for students on thick sandwich courses, or during the year in which the second placement falls for students on thin sandwich courses. Students charged at 10% of the equivalent full-time fee.

If a placement year is to be undertaken abroad and supported by University funding through the University's exchange programmes, fees will increase to 15% of standard fees to cover additional support, advice and administration costs.

Additional information

Degree Overview

The programme develops students into future healthcare leaders who understand health policy, community change, human behaviour change, or health service design.

The programme places emphasis on leadership and strategic thinking, developed through comprehensive qualitative and quantitative research, analysis and evaluation. It is tailored to the demographic and epidemiological challenges of contemporary urban societies – the diseases of affluence and ageing, and the marginalized and vulnerable populations produced by these kinds of settings.

The Bradford MPH provides training in public policy, health care practice development, epidemiology, and community development that focuses on skills for change, making it a must-have qualification for those wishing to address the contemporary challenges of public health or undertake research in the public health field.

The following specialisms are available:

Global Perspective on Quality Health Care
Leading and Managing Change in Health Care

Improvement Management of Global Pharmaceutical Supplies
Working with Communities
