Speciality

International College Dundee

If you do not meet our academic grade requirements for your chosen course, we can offer you an alternative route to begin your studies. Our international incorporated degrees will develop your subject knowledge, academic English and university level study skills.

Pathways Available - International Stage One

Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

Degree Overview

We experience the work of interaction designers whenever we reach for a mobile phone or a digital product and interact with a website, an app, music, media, or with another person.

Digital Interaction Design is an established and rapidly growing profession. It blends product design, graphic design, computing, web and app development, together with user research. World-leading companies such as Facebook, the BBC, Tesco Bank, and IDEO employ interaction designers to make their products, services, and systems more effective and enjoyable.

You'll develop the skills to identify and respond to people's needs, with a focus on user experience. You do not need to have a strong computing background, as this course will teach you all you need to know.

You will be able to critically reflect on the impact that digital technology and our designs have on society and consider inclusion in its many forms. We encourage you to read, talk, and write about current issues.

We have hardware, software, lecturers, and technicians to support prototyping of apps, screen-based content, and interactive objects. We involve members of the community in the design process to find meaningful outcomes together.

Study Reasons

Our alumni have gone on to work with companies such as Adidas, Barclays, Facebook, IDEO, The Scottish Government, and Technology Will Save Us.

Graduates have gone on to have successful careers in: Interaction design, User Experience (UX) and User Interface (UI) development and web and app design

Digital Interaction Design is an established and rapidly growing profession. It blends product design, graphic design, computing, web and app development, together with user research.
