- Exhibitions and fairs
- Filming & production locations
- Meetings, workshops & training rooms
- Performances and productions
- Special occasions and celebrations

Speciality

Placement fee: £1,850

Pathways Available

International Year Zero

Additional information

Degree Overview

Psychology is the scientific study of the mind and how it shapes and influences our behaviour. On this course, we explore human behaviour using sound scientific methodology – observation, measurement, and testing – to understand how and why people function in the way they do.

Gaining a professionally accredited psychology degree is an essential first step to a career as a psychologist or to move on to postgraduate study. Our graduates thrive in careers where an understanding of societal issues is key – in criminal justice, education, social work, research, advertising, human resources and healthcare.

On the course you'll study core areas including biological, cognitive, developmental and social psychology, and you'll cover personality and intelligence, research methods, and historical perspectives. You'll also complete a work experience placement where you'll see academic theory applied in practice.

Study Reasons

Graduates from this course have gone on to work in a variety of roles across a range of well-respected industries including police services, teaching, social work, human resources, healthcare, research, and advertising.

Psychology graduate Shanley Lewis is now working as an assistant psychologist for the NHS, after she was inspired to pursue a career helping others when her dad suffered a stroke.

Our careers programme DMU Works can help you secure a placement through activities such as mock interviews and practice aptitude tests, and you will be assigned a personal tutor to support you throughout your placement.
