Speciality

Spotlight Module "Portfolio Management and Trading"

In today's dynamic financial landscape, effective portfolio management and trading are cornerstones of success. Our Specialisation Module in Portfolio Management and Trading equips you with the essential skills to navigate the complexities of the market.

Additional information

Asset Management, MSc

Our Master's degree programme Asset Management is application-oriented and provides students with in-depth knowledge in the areas of corporate finance, corporate structuring and consulting in an international context and in-depth knowledge in the areas of Portfolio Management and Trading, Financial Analysis and Investments, Risk Analysis and Decision-Making, Cryptocurrencies and International Markets and Stock Exchange as well as Project Management and Advanced Research Methodologies.

Graduates will have a broad, detailed and critical understanding of finance, and asset management at the current level of their field of study and will be able to apply this independently in professional contexts. They are able to independently acquire new knowledge as well as develop scientific questions, process them on the basis of the current state of research and generate innovative solutions.

The programme is aimed at graduates of economic subjects, in particular Financial Management, Real Estate Management, Business Administration and Economics.
