Speciality

For Dubai applicants

- 1.5 Year - 20 210 Euro
- 2 Year - 26 635 Euro

Additional information

Design digital products

The design profession is in constant flux. Design must not only be equally contemporary and traditional but also encompass the world of new digital media. More and more companies are relying on visual and experience design in the development and marketing of their products, brands and services, actively involving their customers in the digital transformation. The product becomes visually and tangibly present. Various senses are engaged, but the most important remains the visual allure, crucial in communication. Therefore, the master's in visual and experience design combines technological know-how with creative design, making it essential for launching your career in the field.

Study Visual & Experience Design and build a career.

In our Master's programme in Visual & Experience Design, students gain an understanding of innovations in the realm of digital, computer-assisted, and physical interactions that permeate our daily lives. All topics are taught in consecutive clusters, enabling students to grasp theories, apply them to **real contexts**, and devise entirely new scenarios. This course focuses on fostering critical awareness of the **balance between creative, commercial, and business considerations** to develop visual narratives using a variety of tools and graphic elements.

The international design industry is in search of talents adept at delivering functional and appealing user interfaces (**UI**) as well as crafting sustainable user experiences (**UX**). The fusion of skills in advanced visual design along with methods applied in a **user-centered design scenario** forms the core of the programme at UE.

Potential areas of employment may include: Visual & Experience Designer, Brand Designer, Service Designer, Experience Designer, Product Design Developer, Design Strategist, Creative Director, and Entrepreneur.
