Speciality

Complete study program volume CP **(ECTS):** 120 or 90

Additional information

About the Programme

Computing is presented in all aspects of the society, and the demand is insatiable. Emerging technologies are changing our life so quickly that there are many opportunities available for specialists in this area.

Programme is designed for those who aim to lead and develop innovative IT solutions and become experts in cutting-edge technology. Graduates of this programme can also establish themselves as qualified professionals in the fields of software engineering and modern IT operations. The programme includes advanced aspects of classical computer science and emerging technologies, thereof, in preparing professionals for a successful career.The Master's study programme trains students by deepening their knowledge and practical skills in the rapidly developing computer science technologies. The programme includes basic aspects of computer sciences and practical application thereof in preparing professionals for a successful career in research and development. The study programme provides a unique set of courses led by the best local and international professors and specialists. Joining the programme allows you to gain international experience from professors from the University of Deusto (Spain), University of Electro-Communications (Tokyo), etc. After successful completion of the study programme, students will be able to work in the IT field using the latest computer science technologies, manage IT project development groups as well as develop data products and IT solutions based on artificial.

Potential careers…
the expert in emerging technologies to solve complex problems in any area of human life, by leading and developing advanced IT solutions
