Cost : 35 430 USD

Reg. fee : 85 USD

Scholarship :

Insurance : 2 765 USD

Intake/s

Jan/May/Aug

Requirements

Academic requirements

First-year students must:

- Have a 3.00 grade point average (GPA) (a "B" or better where "A"=4.00) from a secondary school. Some ASU programs may have higher admission or English proficiency requirements and may consider a minimum ACT or SAT score.
- Must have three years of high school coursework. (If you are currently in high school, ASU needs to see 9–11 grade coursework. If you have completed high school, ASU needs to see 10–12 grade coursework.)
- Must have and present a completed high school diploma or certificate.

Conditional admission

ASU may offer conditional undergraduate admission to international applicants to an on-campus program who meet the academic (aptitude) requirements but who are not proficient in English. This offer of conditional admission will give you time to improve your English proficiency before you start classes at ASU. Your conditional admission offer is good for up to three semesters, during which time you must meet one of these requirements to begin your ASU experience.

Competency requirements

International students who completed high school outside the U.S. are required to meet the following competency requirements:

- Math: four years (algebra I, geometry, algebra II and one course requiring algebra II as a prerequisite).

- Laboratory science: three years total (one year each from any of the following areas are accepted: biology, chemistry, earth science, integrated sciences and physics).

Provide evidence of English language proficiency (TOEFL 61)

Additional information

Program description

In a globalized world with increasing political, economic, demographic and climatic challenges, studies in international relations are all the more prized by the public and private sectors.

Students in the BS program in international relations develop analytic and quantitative skill sets and mastery of forward-thinking content areas through rigorous curriculum, unique internships and research. Students gain valuable practical knowledge about national security, cybersecurity, AI-intelligence strategies, conflict processes, diplomacy, international trade, and both international organizations and countries across the globe.

Concurrent program options

Students pursuing concurrent degrees (also known as a “double major”) earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- International Affairs and Leadership, MA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program.

Global opportunities

Global experience

Faculty expertise and an international network of public, private and nonprofit partnerships provide international relations students with unique and impactful internships and research opportunities at home, in Washington, D.C. and abroad. With more than 300 Global Education program opportunities available, international relations students are able to tailor their experience to their unique interests and skill sets. Whether in a foreign country, in the U.S. or online, students build communication skills,

learn to adapt and persevere, and are exposed to research and internships across the world, increasing their professional network.

Career opportunities

Graduates have analytic and statistical skills useful for successful careers in many areas. They are prepared for a range of employment opportunities in the fields of:

- data analytics
- foreign service
- intelligence and security
- journalism
- law
- political science
- politics
- public relations

Program graduates are prepared for positions in the following types of establishments:

- federal and international civil service
- foreign service organizations
- intelligence and security agencies and contractors
- international agencies and organizations
- international development institutions
- law firms specializing in international law
- lobbying and advocacy groups
- local, national and global nonprofit organizations
- local and national media organizations
- multinational corporations
- political consulting firms
- research institutions

International relations graduates have experience in applied statistics and policy analysis which will prepare them for careers as foreign service officers; security, business and policy analysts; and other data-driven positions.

In addition, graduates are well positioned to attend top-tier graduate, law and professional schools in global trade, public policy, diplomacy and leadership, political science and data analytics.
