Accommodation

Provided by partner agencies

Additional information

Bachelor of Science in Civil Engineering (BS CE)

The Civil Engineering undergraduate program educational objectives are to prepare our alumni/ae with the knowledge and skills needed to:

- actively contribute to the practice and profession of engineering, including management and administration, in the public, private or academic sectors in the technical areas of construction, environmental, geotechnical, structural, transportation, and water resources engineering;
- follow a path towards leadership in the profession that can include licensure as professional engineers who design and construct solutions to civil engineering problems in the natural and built environments; and
- practice life-long learning through post-graduate and professional education.

For a full curriculum outline see our Advising page. A typical 4-year course sequence to complete the 128 credits requires by the program is shown below:
