## Speciality

### Spotlight Module: "Consumer Psychology"

In the Consumer Psychology module, students delve into the theoretical underpinnings of consumer behavior and advertising effectiveness. They gain a deep understanding of **advertising concepts**, **communication policy**, and models for effective **advertising strategies**. Throughout the course, students learn to implement cognitive and affective principles in consumer behavior analysis and recognize unconscious influences on decision-making. Additionally, they reflect on current **neuromarketing findings** and explore principles of **conscious decision-making**, **decision heuristics**, and **emotional appeals** in advertising. By the end of the module, students are equipped to design advertising messages that resonate with consumers, utilizing psychological insights and theoretical knowledge acquired in the course.

#### Additional information

### Become a business psychologist

Globalisation, digitalisation, and demographic change are creating new challenges for companies and employees. Stress-related illnesses in the work context are on the rise. Our economy needs experts who support the working world of the future with their psychological and economic know-how.
