Speciality

For Dubai applicants

- 1.5 Year - 20 210 Euro
- 2 Year - 26 635 Euro

Additional information

Design digital products

The design profession is in constant flux. Design must not only be equally contemporary and traditional but also encompass the world of new digital media. More and more companies are relying on visual and experience design in the development and marketing of their products, brands and services, actively involving their customers in the digital transformation. The product becomes visually and tangibly present. Various senses are engaged, but the most important remains the visual allure, crucial in communication. Therefore, the master's in visual and experience design combines technological know-how with creative design, making it essential for launching your career in the field.

Visual & Experience Design is a master programme welcoming the applicants majoring in visual and graphic design, product design, interaction design, communication and marketing, media and web design, new media or coding- or software engineering-related subjects.

Students will gain deep knowledge of the social repercussions of data technologies, including analytics and AI. They will also learn to design across a spectrum of digital prototyping platforms such as Sketch, Figma, InVision, etc. Additionally, they will advance in UI/UX design coupled with object-oriented interactive prototyping. Moreover, students will develop advanced data visualization design skills and more.
