Additional information

## **Degree Overview**

Develop your specialist knowledge in microbiology and biotechnology to prepare you for work in this dynamic area.

78a Vazha Pshavela Ave, Tbilisi, Georgia Phone: +995 322 96 11 22

Mobile: +995 596 96 11 22

# Study Abroad Consultant Hub

Through specialist modules in medical, food and environmental biotechnology, you'll explore how to exploit the diversity of microorganisms in the production of drugs and food and the decontamination of polluted environments.

In second year, students do have the option of undertaking 'Volunteering and Employability'. This can include an element of work placement. This will prepare you for employment in a wide range of occupations, including those requiring specialist knowledge in microbiology and biotechnology.

You'll learn how the human immune system responds to invading bacteria and viruses, and how this knowledge is exploited by pharmaceutical industries in the development of drugs, vaccines and diagnostics.
