- Accessible launderette
- Focus on sustainability

students may choose to explore private accommodation in Bradford. Average prices are expected to be between £50-£130 per week excluding bills.

### **Accommodation Costs:**

- The Green Village: £85 per week
- Townhouse: £75 per week

### **Speciality**

**Pathways Available:** Pre-Master's

**Sandwich course fees** - charged during the placement year away from the University of Bradford for students on thick sandwich courses, or during the year in which the second placement falls for students on thin sandwich courses. Students charged at 10% of the equivalent full-time fee.

If a placement year is to be undertaken abroad and supported by University funding through the University's exchange programmes, fees will increase to 15% of standard fees to cover additional support, advice and administration costs.

### **Additional information**

## **Degree Overview**

The course strongly emphasises the integration of biological and archaeological evidence to address problem-orientated research themes and the application of scientific methods to unravelling the human past.

It provides advanced instruction in the identification and analysis of human remains, the techniques and methods applied to understanding human skeletal morphological variation, and the means by which to assess pathological conditions affecting the skeleton.

The course provides access to our world renowned collection of reference material (The Bradford Human Remains Collection), hands-on experience in the School's laboratories, and a substantial individual research dissertation.

The course can be used either as vocational training or, for the MSc, as a foundation from which to commence further research. The course is normally offered on a full-time basis but a part-time route is feasible as well. Individual modules are available to candidates wishing to enhance their specialist knowledge in a particular area.
