Speciality

Pathways Available: International Foundation Year | International Year Zero

Sandwich course fees - charged during the placement year away from the University of Bradford for students on thick sandwich courses, or during the year in which the second placement falls for students on thin sandwich courses. Students charged at 10% of the equivalent full-time fee.

If a placement year is to be undertaken abroad and supported by University funding through the University's exchange programmes, fees will increase to 15% of standard fees to cover additional support, advice and administration costs.

As part of this course you will be required to purchase a lab coat worth £10.

Additional information

Degree Overview

Biomedical scientists were one of the key workers working tirelessly since the pandemic began to develop diagnostic tests, run COVID testing laboratories, develop vaccines and support doctors in

the urgent research into treatment and prevention strategies for the virus. It is a career at the cutting-edge of medical research.

The studies of Biomedical Science is the in-depth study of human biology in both normal and disease states. This degree programme provides you with detailed understanding of the causes of human disease, how these produce symptoms and the effects of disease on the structure and function of human cells, tissues, and the whole organism. Through this course you will learn both current techniques used in the study of human diseases in the NHS, and innovative technologies under development for experimental treatments.

Recent investment in the Digital Health Zone allows students to access the latest techniques in digital anatomy and pathology, including carrying out digital dissection.
