Speciality

Pathways Available: International Foundation Year | International Year One | International Year Zero

Sandwich course fees - charged during the placement year away from the University of Bradford for students on thick sandwich courses, or during the year in which the second placement falls for students on thin sandwich courses. Students charged at 10% of the equivalent full-time fee.

If a placement year is to be undertaken abroad and supported by University funding through the University's exchange programmes, fees will increase to 15% of standard fees to cover additional support, advice and administration costs.

Additional information

Degree Overview

In an increasingly competitive environments, professionals within the financial sector require a more detailed view of their organisations financial data.

This degree programme is designed with inputs from leading industry professionals and strikes a balance between the mechanics of analytical methods and the dynamic finance-related decision-

making process. The aim of this programme aims to develop students as finance professionals of the future who, equipped with analytics skills, have the appropriate attributes to reduce risks through making smarter, timely and more accurate financial decisions.

Students of this course will gain technical data science skills and non-technical management skills along with a deep understanding of the application of analytics within the context of financial management.
