Requirements

If you have completed academic work outside the U.S., you must provide official academic credentials as well as English translations of the documents. If only one document is available, we will accept notarized or certified copies of the original document. If translations are needed, it is your responsibility to have the credentials translated by a reputable translation and evaluation service. Syracuse University will not provide translations for you. A key to the marking system or grading scale should also be included if it is not indicated on the transcript.

- **First-year Students:** Attending and graduating from in-person secondary schools based in the United States for at least three full academic years (Grades 10-12).
- **Transfer Students:** Have completed at least 24 credits in person at a post-secondary institution in the United States. Students must have earned a cumulative GPA of 3.0 or higher, excluding ESL curriculum.

International Year One in Available (47 200)

Please note that students completing the British curriculum are not eligible to apply upon completion of the IGCSE/GCSE; we require at least one additional year of education. Additionally, we do not accept the BTEC for admission at this time.

Progressing students into Syracuse University receive the following merit awards for each subsequent year of enrollment based on the cumulative GPA earned upon the completion of the 30 credit hours:

- A GPA between 3.25 and 3.49 is \$10,000 per year
- A GPA between 3.5 and 3.74 is \$15,000 per year
- A GPA greater than 3.75 is \$20,000 per year

Additional information

Degree Overview

The Health Humanities integrated learning major (ILM) enhances Arts and Science/Maxwell students' preparation for the health professions through a curriculum that situates health and medicine within complex sociocultural ecologies. Students can supplement any major with the Health Humanities ILM. The curriculum engages with social and ethical questions that are central to all medical fields, as well as broadening students' appreciation of the different directions they might take in pursuing their interest in health.

Study Reasons

Learn new ways of thinking about disability, as well as about the impact of illness on people's lives, and increase your empathy and tolerance for ambiguity—important skills in the health professions.

Explore different career options: Through one-on-one academic advising, internships and career conversations, find a health-related career that best suits your interest in health, disease, healing and disability.

Gain an edge in your MCAT performance (with our emphasis on critical thinking and bioethics) and admissions to medical schools or prepare for successful further study in health-related fields. Apply to this Program
