Halls are 10-minutes away from big supermarkets and the train station. Even less is the walk to get to the city centre, full of restaurants, cafes and bars.

#### Speciality

#### International College Dundee

If you do not meet our academic grade requirements for your chosen course, we can offer you an alternative route to begin your studies. Our international incorporated degrees will develop your subject knowledge, academic English and university level study skills.

Pathways Available - International Stage One

Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

# **Degree Overview**

Scientific developments are possible due to mathematical applications while mathematical models inform decisions in industry, government, and within economics.

Our course combines both pure and application-driven mathematics. By the time you finish your degree, you will be able to use maths to solve practical problems. You'll explore the relationship between mathematical modelling and economics. You'll also examine how societies attempt to make the best use of their scarce resources.

Advising on investment, production and prices are decisions that people might associate with economists, but they are increasingly asked to advise on:

policies to address climate change

policies to address inequality

policies to improve the National Health Service

many other issues including; marriage, religion, civil war, football hooliganism

Our course focuses specifically on the macroeconomic challenges of national, regional and global economies together with the microeconomic behaviour of people and businesses. Combining these subjects will give you an excellent foundation for your career as an economist but also offers scope to pursue a diverse range of high-earning opportunities.

Our Investment Society organises annual speakers and employer workshops. You will also be able to join DUMaS (Dundee University Maths Society), an active society open to all students studying mathematics.
