## Speciality

**Pathways Available:** International Foundation Year | International Year Zero

**Sandwich course fees** - charged during the placement year away from the University of Bradford for students on thick sandwich courses, or during the year in which the second placement falls for students on thin sandwich courses. Students charged at 10% of the equivalent full-time fee.

If a placement year is to be undertaken abroad and supported by University funding through the University's exchange programmes, fees will increase to 15% of standard fees to cover additional support, advice and administration costs.

**As part of this course you will be required to purchase a lab coat worth £10.**

## Additional information

# Degree Overview

This degree course emphasises on the application of science – in particular analytical chemistry – and stresses the importance of quality assurance procedures in a forensic setting.

A characteristic of the University of Bradford's approach is the integration of practical skills training within a good theoretical framework – whether in terms of crime scene investigation, the collection, examination and interpretation of physical evidence, laboratory processing and analysis.

The course provides you with a sound knowledge of how scientific techniques can be used within forensic investigations, and allows you to explore a challenging area of applied science. You will develop into a professional with the scientific skills to work within areas such as crime scene investigation, forensic science and related laboratory areas.

This degree will help you acquire the skills that will be useful in whatever profession you choose to follow. These include project and time management, critical review and analytical thinking, presentational skills, computer and other applied IT skills and the management of data. These will be taught, practised and assessed.

## Study Reasons

Bradford was the first university in the UK to offer a forensics science degree, and continuously develops the programme to ensure that it is up-to-date with the requirements of the forensics sector.

This course will offer you a wide-ranging career opportunities, including the health service, the forensic science or police scientific support laboratories, the Health and Safety Executive, and the public analysts' laboratories, as well as opportunities in the chemical, petrochemical, pharmaceutical, food, drink and electronics industries.
