Additional information

Course overview

The BSc (Hons) Computer Science programme focuses on the technical aspects of computing, placing a strong emphasis on programming skills. This will help you to attain the vital technical knowledge required to pursue a range of IT careers, as well as the transferable employability skills needed to secure your first role.

This hands-on degree programme will encourage you to develop an extensive knowledge of computer programming, where you will have the opportunity to complete the **CCNA** (Cisco Certified Network Associate) “Introduction to Networks” course and develop your skills by designing, building and implementing computer systems, culminating in a major final-year software development project.

The UK’s IT industry is worth £58 billion annually. With projections suggesting the UK has the potential to create a further three million new technology jobs by 2025 (techuk.org), the demand for well-qualified information technology graduates is set to remain strong.

With a strong focus on programming (using Java and Python), the course includes a variety of software development, database, web development and networking units. You will also look at web APIs, JSON, HTML5 and big data analytics.

- Develop a range of broadly applicable IT skills such as programming, databases, networking, usability and web technologies
- Build communication, project management, teamwork and presentation skills through group and project work
- Develop extensive knowledge of computer programming

Teaching and assessment

- Lectures, seminars and workshops: **9-12 hours per week.**
- Independent study: **38 hours per week.**
- Assessment: **coursework and exams.**

Blended learning

The future is becoming more and more digital. Our blended learning approach allows you to develop all necessary skills to thrive in the digital era. You'll get the best of both worlds with a balance of face-to-face and online teaching, building your confidence ready for success in the digital workplace.??

Receiving the same number of live contact hours as face-to-face programmes, a typical timetable may include:?

- Daytime students – If you are a daytime student, you will typically have 2 days of tuition per week – your sessions will be on-campus for 1 of those days and the other day will take place live online.?
- Evening and weekend students – Evening and weekend blended timetables will typically follow one of the below patterns each week:?
 - 2 evenings live online and 1 weekend day face-to-face on-campus, or??
 - 2 evenings face-to-face on-campus and 1 weekend day live online ?
