Pre-master's (Computing)

Additional information

Degree Overview

The computer science industry is in high demand for professionals in business analysis, web design, system development and project management, as well as IT support and training. This MSc in Computing and Information Systems is designed to meet those needs. Through this degree programme you will explore software tools and techniques and systems modelling, alongside options that range from data warehousing and project management to developing mobile apps. This is an ideal course for recent graduates and computing practitioners who require more formal training as it offers a solid foundation in modern software tools and the principles of good software engineering, we provide the skills you need to seek exciting new job opportunities.

Study Reasons

- The University of Greenwich has a long-standing relationship with the British Computer Society (BCS), which accredits our computing degree programmes.
- Through this course you will develop an in-depth knowledge necessary to enhance your current skill set within Computing and Information Systems.
