Additional information

Degree Overview

This innovative programme provides you with a thorough theoretical, conceptual and research informed grounding in the discipline of sport and exercise psychology. You will develop a strong scientific understanding of human behaviour and experience, and of the complex interactions between these. You will also enhance your understanding of relationships between the theoretical concepts and current techniques used in sport and exercise psychology assessment and support. This will include becoming familiar with the different types of approaches, assessment strategies, and psychological skills used by Applied Sport and Exercise Psychologists. The curriculum is diverse,

covering a wide range of topics. You will explore critical psychological factors that affect, sports performance, wellbeing and exercise participation. The curriculum will allow you to study more in-depth knowledge and its application in sport and exercise science. You will develop a strong scientific understanding of human behaviour and experience, and of the complex interactions between these.

Study Reasons

- This programme is accredited by the British Psychological Society
- Roehampton's unique employment focused initiatives, including guest speakers, networking opportunities, and entrepreneurship workshops ensure that you are prepared for your chosen career
